10 September 2008

To all holders of Existing Ordinary Shares

Dear Shareholder,

**Proposed Capital Reorganisation
Proposed Subscription for 1,000,000,000 New Ordinary Shares at 0.02p per Share
Proposed issue of 500,000,000 Warrants
Approval of waiver of obligations under Rule 9 of the Takeover Code
and
Notice of Extraordinary General Meeting**

1. Background to and reasons for the Proposals

The Board has today announced that it proposes to raise £200,000, before expenses, (£144,000 after expenses) by way of a conditional subscription for 1,000,000,000 New Ordinary Shares at 0.02p per share. A Warrant to subscribe for one New Ordinary Share (at an exercise price of 0.02p per New Ordinary Share) is to be issued for every two Subscription Shares subscribed pursuant to the Subscription Agreement. Christopher Potts and Robert Quedest (together the "Concert Party") have conditionally agreed, subject to Shareholder approval, to subscribe for, in aggregate 900,000,000 New Ordinary Shares (and attached warrants to subscribe for up to 450,000,000 New Ordinary Shares). The remaining 100,000,000 New Ordinary Shares (and warrants to subscribe for up to 50,000,000 New Ordinary Shares) are to be issued to Barnard Nominees Limited, on behalf of certain of its clients (none of whom have any connection with either member of the Concert Party). In order to effect the Subscription the Company has also today announced the proposed Capital Reorganisation.

In view of the size of the proposed shareholdings of the Concert Party in the Company following Admission, the Subscription would represent a change in control under the Takeover Code. This would require an offer to be made on behalf of the Concert Party to acquire the balance of New Ordinary Shares not owned by them pursuant to Rule 9 of the Takeover Code unless a waiver of this requirement is approved on a poll by independent holders of Existing Ordinary Shares at the EGM. The EGM has been convened for 12.30 p.m. on 30 September 2008, notice of which is set out at the end of this document. The Proposals outlined in this document are conditional upon holders of Existing Ordinary Shares passing the Resolutions at the EGM. The Subscription will give the Concert Party a shareholding of approximately 84.6 per cent. of the Enlarged Ordinary Share Capital (and following the exercise of all their Warrants approximately 89.2 per cent. of the then issued ordinary share capital of the Company, assuming only the members of the Concert Party exercise their Warrants) and that no other warrants are exercised and no additional New Ordinary Shares are issued.

It is expected that, subject to the Resolutions being approved by holders of Existing Ordinary Shares and the Subscription Agreement becoming unconditional in all respects, dealings in the New Ordinary Shares to be issued pursuant to the Subscription will commence on or around 1 October 2008.

The purpose of this document is to explain the background to and reasons for the Proposals, why your Directors believe that the Proposals are in the best interests and will promote the success of the Company for the benefit of the holders of Existing Ordinary Shares as a whole and that they recommend that you vote in favour of the Resolutions as they have irrevocably undertaken to do in respect of their own beneficial holdings of Existing Ordinary Shares.

You should read the entire document and your attention is drawn in particular to this Part I, which contains important information in relation to the Proposals, the “Risk Factors”, which are set out in Part II and Part III, which contains certain summary financial information relating to the Group.

2. Background to and reasons for the Proposals

On 28 February 2007, following a review of operations, the Board decided to close its operating business, TV Commerce Limited and conserve cash rather than invest further funds in an uncertain regulatory environment.

On 17 March 2008, the Company made a capital distribution of £399,903.29 in aggregate, being 0.6231p per Existing Ordinary Share.

In addition, whilst the Company continues to be quoted on AIM, it is required to retain advisers and incur costs which in themselves diminish available resources.

The Proposals announced today include, *inter alia*, the Subscription and will provide the Company with the opportunity to carry out due diligence on potential investment opportunities that the Directors may identify in accordance with the Investing Strategy, for transaction costs and additional working capital. Further information on the Investing Strategy is set out in paragraph 8 of this Part I.

Shareholders should note that following the Subscription their shareholding in the Company will be significantly diluted.

The Board believes that the Company has a viable future and is capable of creating shareholder value in the medium term if it can overcome its current funding needs and can grow by acquisition.

In the event the Proposals are not completed, the Board will consider its position in relation to the Subscription and in respect of the Company’s current trading and working capital position but in the absence of the Subscription or proposed further funding being available, it is unlikely that the Company will be able to meet its liabilities as they fall due and may result in the Company becoming insolvent.

3. Capital Reorganisation

Certain changes to the share capital of the Company are necessary in order to effect the Subscription. Under the Acts no share may be allotted fully paid at a discount to its nominal value. The nominal value of each Existing Ordinary Share is 0.1p and the Subscription Price is 0.02p per Subscription Share. Accordingly, to effect the issue of New Ordinary Shares at less than the present nominal value, it is proposed to subdivide and convert each issued Existing Ordinary Share of 0.1p into 1 New Ordinary Share of 0.02p each and 1 Deferred Share of 0.08p. This will result in 64,179,632 New Ordinary Shares and 64,179,632 Deferred Shares being in issue immediately following the Capital Reorganisation. As such, following the Capital Reorganisation, each Shareholder will have the same number of New Ordinary Shares as Existing Ordinary Shares held before the Capital Reorganisation.

The Board believe that the Capital Reorganisation will give the Company greater flexibility to effect its Investing Strategy.

Each New Ordinary Share will have the same rights (including voting rights, dividend rights and rights on a return of capital albeit on the basis of a reduced nominal amount) as each Existing Ordinary Share. Certificates for each Existing Ordinary Share will remain valid for the same number of New Ordinary Shares arising on the Capital Reorganisation.

The rights of the Deferred Shares, which are set out in the Notice, will render them effectively worthless and no application will be made to admit the Deferred Shares to trading on AIM. It is proposed that, in due course, the Deferred Shares will be cancelled.

4. Details of the Subscription and the Warrants

The Company requires additional funding, so in order to provide working capital the Company is proposing to raise £200,000 (before expenses) by the issue of 1,000,000,000 Subscription Shares pursuant to the Subscription Agreement representing approximately 94.0 per cent. of the Enlarged Ordinary Share Capital. The Subscription is not being underwritten and is conditional, *inter alia*, upon the Resolutions being passed by holders of Existing Ordinary Shares at the EGM and Admission. 900,000,000 Subscription Shares are to be issued to the Concert Party, with the remaining 100,000,000 Subscription Shares to be issued as described in paragraph 1 above. The Subscription Shares, when fully paid, will rank *pari passu* in all respects with the New Ordinary Shares.

A summary of the principal terms of the Subscription Agreement is set out in paragraph 9.1 of Part IV of this document.

In addition, it is proposed that Warrants be issued to those applying for Subscription Shares in accordance with the terms of the Subscription Agreement in the proportions set out below. Each Warrant will entitle the holder to subscribe for one New Ordinary Share for every two Subscription Shares Subscribed. The Warrants will be over an aggregate of 500,000 New Ordinary Shares and will be exercisable at a price of 0.02p at any time from the date of Admission until 30 September 2013. The Warrants will not be admitted to trading on AIM or any other stock exchange nor will any other dealing facility in them be sought. The Warrants are freely transferable.

<i>Shareholder</i>	<i>Number of Warrants</i>
Robert Quested*	325,000,000
Christopher Potts*	125,000,000
Barnard Nominees Limited	50,000,000
Total	<u>500,000,000</u>

* As Christopher Potts and Robert Quested are members of the Concert Party the proposed issue of the Warrants has certain implications under Rule 9 of the Takeover Code. Further details are set out in the paragraph 10 of this Part I.

A summary of the principal terms of the Subscription Warrant Instrument is set out in paragraph 9.2 of Part IV of this document.

To enable the Company to issue New Ordinary Shares pursuant to the Subscription and upon exercise of the Warrants, it is necessary for the Company to obtain approval of the holders of Existing Ordinary Shares to increase the Company's authorised share capital and grant the Directors the authority to issue and allot the Subscription Shares and the Warrants, together with a disapplication of the statutory pre-emption rights of the holders of Existing Ordinary Shares arising on the allotment of the Subscription Shares and the Warrants for cash.

If Resolution 1 is not passed, the Directors will need to consider other options to finance the continued development of the Company. Should further financing not be forthcoming then it is unlikely that the Company will be able to meet its liabilities as they fall due and may result in the Company becoming insolvent.

5. Lock in Agreements

On Admission, Christopher Potts and Robert Quested will hold an aggregate of 900,000,000 New Ordinary Shares representing approximately 84.6 per cent. of the Enlarged Ordinary Share Capital.

Under the terms of the agreements, each member of the Concert Party has undertaken to the Company, DCA and DCS that he will not sell or otherwise dispose of any interest in New Ordinary Shares beneficially owned or otherwise held or controlled by him other than in certain limited circumstances, any of their respective interests in New Ordinary Shares at any time before the earlier of the completion of a reverse takeover as defined by AIM Rule 14 and six months from Admission. These restrictions will not apply to disposals made in connection with acceptance of a recommended takeover offer, in the event of an intervening court order or following the death of the relevant shareholder.

Further details of the lock-in agreements are set out in paragraph 9.3 of Part IV of this document.

6. Details of the Concert Party

The Concert Party comprises Christopher Potts and Robert Quested, who have previously invested in private and public companies. Christopher Potts was first introduced to Robert Quested in 2002 whilst he was an employee of Evolution Group plc, where Robert Quested was a client of its stockbroking subsidiary. In 2006, they pooled their experience and access to capital and secured controlling interests in two small AIM traded companies, Readybuy PLC and Flightstore Group plc, and were subsequently instrumental in the reverse takeovers by Readybuy PLC of Avacta Limited and Flightstore Group plc of VPhase Limited. Since then, Christopher Potts has been seeking to identify other small AIM quoted companies with a market capitalisation of less than £500,000. TV Commerce was identified as such a company and the Board was approached by Mr Potts on behalf of the Concert Party.

Details of the Concert Party members, together with their contact details are set out below:

Christopher Atur Potts (age 41)

Chris began his career in 1986 with stockbrokers Keith, Bayley, Rogers & Co before moving to Winterflood Securities as a market maker in 1988. In 2002, he moved to Evolution Group PLC to expand their trading operation and was appointed head of market making, overseeing in excess of 700 smaller companies. Chris has been involved with a number of private companies and was a shareholder of Proquote Limited which was subsequently acquired by the London Stock Exchange. More recently, Chris was instrumental in the flotation of Avacta Group PLC via a reverse takeover of Readybuy PLC and VPhase PLC via the reverse takeover of Flightstore Group plc. He also assisted in the flotation of an investment vehicle, West End Ventures PLC on the PLUS Market late last year.

Address: Chartview, Westerham Road, Limpsfield, Surrey RH8 0SW.

Robert Thomas Quested (age 63)

Robert is currently resident in the United Arab Emirates where his business interests include pharmaceutical importation and wholesaling. His career in the Middle East started in Saudi Arabia in the 1970s where he was involved in the provision of pharmacy services to the military and continued in a similar capacity in The Sultanate of Oman. He has been an active investor in the UK stock market over the last 30 years. Robert has been a director of Rock Island Investments Limited, a long/short fund, since June 2007, and of Total Boating Solutions, a yacht brokerage, since October 2007.

Address: PO Box 41412, Abu Dhabi, United Arab Emirates.

7. Current and Future Board Composition

As your Chairman, I have chaired the Company through a difficult and challenging period. The Directors believe the Company will be strengthened following the investment by the Concert Party both financially and strategically. Whilst there are no current proposals to change the composition of the Board, it is likely to change upon completion of any successful acquisition by the Company.

8. Investing Strategy

As the Company does not currently trade, it is deemed under the AIM Rules to be an ‘Investing Company’ and is therefore required to have an investing strategy.

Resolution 6 to be proposed at the Annual General Meeting deals with obtaining Shareholders’ consent to implement an investing strategy pursuant to AIM Rule 15.

The Company’s strategy is to invest in, participate in joint ventures with or acquire one or more companies or businesses, in the natural resource sector in Africa (but will consider other geographical areas), where that is considered appropriate.

The Company must undertake an investment which constitutes a reverse takeover (as defined by the AIM Rules) by 29 September 2009 (within 12 months of the 2008 Annual General Meeting), after which date the Company’s shares will be suspended from trading on AIM for a period of up to six months, then its admission to AIM will be cancelled and funds returned to Shareholders.

The Company will be an active investor and will spread its investments across one or two opportunities which the Directors consider have:

- an experienced and professional management team; and
- the ability to add value to TV Commerce in the short and medium term.

The Directors believe that the natural resource sector is capable of delivering attractive levels of investment return and that there are a number of companies in this sector that would benefit from greater access to capital, quoted company profile and support.

When an acquisition has been identified, the Directors will mandate an independent and suitably qualified person with relevant experience to perform due diligence on any potential acquisition. In addition, in the event of a reverse takeover (as defined by the AIM Rules), an executive director with relevant sector experience will be appointed to the Board.

The Directors intend to pursue such investment opportunities and intend to fund them by using a combination of cash, the issue by the Company of new securities and possibly through debt finance as the Directors consider appropriate.

9. Corporate Governance

The Directors recognise the value and importance of effective corporate governance and observe the principal provisions of the combined code on corporate governance issued by the Financial Reporting Council, to the extent that they consider them to be appropriate for a company of its size and nature.

The Board has established an Audit Committee and a Remuneration Committee with formally delegated duties and responsibilities.

The Remuneration Committee is constituted solely by Andrew Mintern and determines the terms and conditions of service contracts of the executive Director, including his remuneration and grant of options.

The Audit Committee is constituted solely by Andrew Mintern and is responsible for reviewing the accounting policies, internal controls and the financial information in the Company's annual and half-yearly reports and/or accounts, in all cases having due regard to the interests of Shareholders.

The Directors do not consider that, given the size of the Board and its Investing Strategy, it is necessary to have a nominations committee. The Company has adopted a share dealing code and, in accordance with AIM Rule 21 on share dealing, will take all reasonable steps to ensure compliance by the Directors.

10. The Takeover Code

Under Rule 9 of the Takeover Code, any person who acquires an interest in shares (as defined in the Takeover Code) which, taken together with shares in which he and persons acting in concert with him are interested, carry 30 per cent. or more of the voting rights of a company which is subject to the Takeover Code, is normally required to make a general offer to all the remaining shareholders to acquire their shares.

An offer under Rule 9 must be made in cash and at the highest price paid by the person required to make the offer, or any person acting in concert with him, for any interest in shares acquired during the 12 months prior to the announcement of the offer.

The members of the Concert Party are deemed to be acting in concert for the purpose of the Takeover Code. On Admission, the Concert Party will be interested in 900,000,000 New Ordinary Shares representing approximately 84.6 per cent. of the Company's enlarged issued voting share capital. Assuming exercise in full by the Concert Party of the Warrants issued pursuant to the Subscription Agreement (assuming no other person converts any convertible securities or exercises any options or any other right to subscribe for shares in the Company), the Concert Party would be interested in 1,350,000,000 New Ordinary Shares representing approximately 89.2 per cent. of the Company's enlarged issued voting share capital. The earliest date on which the Warrants can be exercised is immediately following Admission.

A table showing the interests in shares of the members of the Concert Party on Admission, and also following the exercise of the Warrants as set out above, is set out in the table below:-

	<i>(i) On Admission*</i>			<i>(ii) Assuming full exercise of the Warrants by the Concert Party only*</i>	
	<i>Number of Existing Ordinary Shares</i>	<i>Number of New Ordinary Shares</i>	<i>Percentage of Enlarged Ordinary Share Capital</i>	<i>Maximum Number of New Ordinary Shares</i>	<i>Maximum Percentage of New Ordinary Shares</i>
<i>Concert Party member</i>					
Christopher Potts	Nil	250,000,000	23.5	375,000,000	24.8
Robert Quested	Nil	650,000,000	61.1	975,000,000	64.4
		<u>900,000,000</u>	<u>84.6</u>	<u>1,350,000,000</u>	<u>89.2</u>

* These are expressed on a consolidated basis assuming that the Capital Reorganisation is approved by Shareholders.

The Panel has agreed, however, to waive the obligation to make a general offer that would otherwise arise as a result of the Proposals and exercise of the Warrants, subject to the approval of independent Shareholders. Accordingly, Resolution 1 is being proposed at the EGM and will be taken on a poll.

Following completion of the Proposals, the members of the Concert Party will hold more than 50 per cent. of the Company's voting share capital and (for so long as they continue to be treated as acting in concert) may accordingly, increase their aggregate interests in shares without incurring any obligation under Rule 9 to make a general offer, although individual members of the Concert Party will not be able to increase their percentage interests in shares through or between a Rule 9 threshold without Panel consent.

11. Dividend Policy

The Directors do not intend to pay a dividend. The Company's current assets and the funds generated by the Subscription will be devoted to funding the Group's search for investment opportunities. The Directors intend to review the dividend policy following any acquisition.

12. Extraordinary General Meeting

The Proposals are conditional upon, *inter alia*, the passing of the Resolutions at the EGM convened for 12.30 p.m. on 30 September 2008 to be held at the offices of DCA at 46 Worship Street, London EC2A 2EA. You will find set out at the end of this document a notice convening the EGM for the purpose of considering and if thought fit approving the Resolutions to:

1. approve the waiver granted in respect of Rule 9 of the Takeover Code;
2. approve the Subscription;
3. increase the Company's authorised share capital;
4. authorise the Directors to allot relevant securities for the purpose of the Subscription, the issue of the Warrants, and generally up to an aggregate nominal value of £200,000;
5. (a) sub-divide each issued Existing Ordinary Share in the capital of the Company into 1 Deferred Share and 1 New Ordinary Share; and
(b) sub-divide each unissued Existing Ordinary Share in the capital of the Company into 5 New Ordinary Shares;
6. amend the articles of association of the Company; and
7. authorise the Directors to allot equity securities otherwise than on a pre-emptive basis for the purpose of the Subscription, the issue of the Warrants, and generally up to an aggregate nominal value of £200,000.

13. Risk Factors

Shareholders should consider fully the risk factors associated with the Proposals and your attention is drawn to the risk factors set out in Part II of this document.

14. Recommendation

The Directors, having been so advised by DCA, consider the Proposals are fair and reasonable and in the best interests of the Company and its shareholders as a whole. In providing advice to the Directors, DCA has taken into account the commercial assessments of the Directors.

Accordingly, your Directors unanimously recommend holders of Existing Ordinary Shares to vote in favour of the Resolutions as they themselves have irrevocably undertaken to do in respect of their own beneficial holdings which amount, in aggregate, to 45,983,967 Existing Ordinary Shares, representing approximately 71.7 per cent. of the issued Existing Ordinary Shares.

15. Action to be taken

A Form of Proxy is enclosed with this document. Whether or not you intend to be present at the EGM, you are requested to complete and return the Form of Proxy in accordance with the instructions printed thereon. PART II

RISK FACTORS

Any investment in the New Ordinary Shares is subject to a number of risks. Investment in the Company constitutes a high risk investment and prospective purchasers of New Ordinary Shares should carefully evaluate the risk factors set out below. Investment in the Company should be regarded as speculative and should be considered long term in nature and suitable only for sophisticated investors who understand the risks involved, including the risk of a total loss of capital.

If any of the following risks actually occur, the Company's business, financial condition, results or future operations could be materially adversely affected. In such circumstances, the trading price of the Company's shares could decline and investors could lose all or part of their investment.

The risks listed below do not necessarily comprise all those risks associated with an investment in the Company and are not set out in any order of priority. Additional risks and uncertainties not currently known to the Directors or which the Directors currently deem immaterial may also have an adverse effect on the Company.

1. Market Risks

- (a) Potential investors should be aware that the value of shares can go down as well as up and that an investment in a share that is traded on AIM may be less readily realisable and may carry a higher degree of risk than an investment in a share listed on the Official List.
- (b) The price which investors may realise for their holding of New Ordinary Shares, as and when they are able to do so, may be influenced by a large number of factors, some of which are specific to the Company and others of which are extraneous.
- (c) It may be difficult for an investor to sell his or her New Ordinary Shares and he or she may receive less than the amount paid by him or her for them.
- (d) AIM has been in existence since June 1995 but its future success and the future market for the New Ordinary Shares cannot be guaranteed.
- (e) The share price of smaller publicly traded companies can be highly volatile.
- (f) The market for shares in smaller public companies, including the Company, is less liquid than for larger public companies. Consequently, the share price may be subject to greater fluctuation on small volumes of shares, and thus the New Ordinary Shares may be difficult to sell at a particular price.
- (g) The Company is in its early stages and does not currently have any revenue and, therefore, the New Ordinary Shares may not be suitable for a short-term investment.
- (h) The market price of the New Ordinary Shares may not reflect the underlying value of the Company's profits or net assets.

2. Business Risks

(a) *The Company's objectives may not be fulfilled*

The Group does not currently trade. The Investing Strategy therefore depends upon identifying a suitable investment opportunity. The value of an investment in the Company is in part dependent upon the Company acquiring or investing in companies or businesses, that meet the Investing Strategy. There can be no guarantee that the Company will be able to do so or that any such company or business will be profitable or will achieve significant or sustainable growth.

(b) *Acquisition opportunities*

The success of the Group depends largely upon the expertise of the Directors and their ability to identify and acquire suitable companies or businesses. There can be no guarantee that the Directors will be able to find appropriate acquisition targets or be able to agree acceptable terms with the vendors of such businesses within 12 months of the date convened for the 2008 Annual General Meeting.

(c) ***No assurance of profitability***

The expenses of operating the Group may exceed the Group's income, thereby requiring the difference to be paid from the Company's capital. Accordingly, results for any period should not be relied upon as being indicative of performance in future periods.

(d) ***Reliance on key management and employees***

The successful operation of the Group will depend partly upon the performance and expertise of its management and employees. The loss of the services of the Group's key management or employees, or a loss of the ability to continue to attract and retain qualified employees, may have a material adverse effect on the Group.

(e) ***Acceptability of New Ordinary Shares as consideration***

Although it is the Company's intention to issue New Ordinary Shares to satisfy all or part of any consideration payable on an acquisition, vendors of suitable companies or businesses may not be prepared to accept shares traded on AIM or may not be prepared to accept New Ordinary Shares at the quoted market price.

(f) ***Requirement for further funds***

It is likely that the Company will need to raise further funds in the future, either to complete a proposed acquisition or to raise further working or development capital for such an acquisition. There is no guarantee that the then prevailing market conditions will allow for such a fundraising or that new investors will be prepared to subscribe for New Ordinary Shares at a price that is not lower than the Subscription Price.

The Group's expansion plans may be constrained to the extent that it is able to raise equity finance or that banks may provide debt or other facilities as required.

The Concert Party is under no obligation to provide funding to the Group beyond the Subscription.

(g) ***Other directorships***

Investors should note that none of the Directors is in any way limited, by way of their involvement with the Company, from acting in the management or conduct of the affairs of any other company. Each of them has and will continue to acquire and hold interests in other businesses and companies and other directorships.

3. Political and Economic Risks

(a) ***Regulatory and legal changes***

The Company's strategy has been formulated in light of the current regulatory and legal environment. The regulatory and legal environment may change in the future and such changes may have a material adverse effect on the Group.

(b) ***General economic conditions***

Changes in general economic conditions in which the Group operates may adversely effect the financial performance of the Group. Factors that may contribute to the general economic climate include the level of interest rates and the rate of inflation.

NOTES TO THE CONSOLIDATED HISTORICAL FINANCIAL STATEMENTS

YEARS ENDED 31 DECEMBER 2005, 31 DECEMBER 2006 AND 31 DECEMBER 2007

1. Accounting Policies

Basis of Preparation of Financial Statements

The Financial Statements have been prepared in accordance with EU-endorsed International Financial Reporting Standards (IFRS), IFRIC interpretations and the parts of the Companies Act 1985 applicable to companies reporting under IFRS. The Financial Statements have also been prepared under the historical cost convention.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's Accounting Policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the Financial Statements, are disclosed in Note 3.

Going Concern

The Group Financial Statements have been prepared on the basis that the Group is not a going concern. A decision was made during 2007/8 to wind down the activities with the intention of ultimately dissolving the trading subsidiary of the Company. The Group's trading activities ceased on 28 February 2007.

Standards and Interpretations in Issue but not yet effective or not yet relevant

IFRS 8 "Operating Segments" requires companies to adopt a management approach to reporting on their operating segments. This standard is effective for the period ended 31 December 2009 and is not expected to have an impact on the Group's financial statement.

A revised version of IAS 1 "Presentation of Financial Statements" will require information in financial statements to be aggregated on the basis of shared characteristics, and introduce a statement of comprehensive income. This standard is effective for the period ended 31 December 2009 and is not expected to have a major impact on the Group's financial statement.

A revised version of IAS 23 "Borrowing Costs" removes the option of immediately recognising as an expense borrowing costs that relate to assets that take a substantial period of time to get ready for use or sale. This standard is effective for the period ended 31 December 2009 and is not expected to have an impact on the Group's financial statement.

An amendment to IFRS 2 "Share-based Payment" clarifies that vesting conditions are service conditions and performance conditions only, and specifies that all cancellations, whether by the entity or by other parties, should receive the same accounting treatment. This standard is effective for the period ended 31 December 2009 and is not expected to have a major impact on the Group's financial statement.

IFRIC 11 "IFRS 2 – Group and Treasury Share Transactions" considers how certain grants of equity instruments should be treated under IFRS 2 "Share-based Payment". This standard is effective for the period ended 31 December 2008 and is not expected to have a major impact on the Group's financial statement.

IFRIC 12 "Service Concession Arrangements" addresses how service concession operators should apply existing IFRSs to account for the obligations they undertake and rights they receive in service concession arrangements. This standard is effective for the period ended 31 December 2009 and is not expected to have an impact on the Group's financial statement.

IFRIC 13 "Customer Loyalty Programmes" addresses accounting by entities that grant loyalty award credits to customers who buy goods or services. This standard is effective for the period ended 31 December 2009 and is not expected to have an impact on the Group's financial statement.

IFRIC 14 "IAS 19 – The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction" provides guidance on how to assess the limit in IAS 19 "Employee Benefits" on the amount of the surplus that can be recognised as an asset. This standard is effective for the period ended 31 December 2008 and is not expected to have an impact on the Group's financial statement.

Basis of Consolidation

The Group Financial Statements consolidate the Financial Statements of TV Commerce Holdings PLC and all its subsidiary undertakings made up to 31 December annually.

Subsidiaries are entities over which the Group has control. Control is the power to govern the financial and operating policies of the entity so as to obtain benefits from its activities. The Group obtains and exercises control through voting rights.

Inter-company transactions, balances and unrealised gains on transactions between Group companies are eliminated. Unrealised losses are also eliminated, unless the transaction provides evidence of an impairment of the asset transferred. Amounts reported in the Financial Statements of subsidiaries have been adjusted where necessary to ensure consistency with the Accounting Policies adopted by the Group.

Foreign Currencies

Items included in the Financial Statements are measured using the currency of the primary economic environment in which the entity operates (its “functional currency”). The Financial Statements are presented in Pounds Sterling (£), which is the Company’s functional and presentation currency.

Transactions in foreign currencies are translated into the functional currency at the exchange rate ruling at the date of the transaction. Monetary assets and liabilities in foreign currencies are retranslated at the rates of exchange ruling at the Balance Sheet date. Foreign exchange differences on retranslation and settlement are recognised in the Income Statement.

Translation differences on non-monetary financial assets and liabilities are reported as part of the fair value gain or loss.

Property, Plant and Equipment

Property, plant and equipment is stated at cost or fair value, net of depreciation and any provision for impairment. Cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset’s carrying amount only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the Income Statement in the period in which they are incurred.

Depreciation is provided on all property, plant and equipment, other than freehold land, at rates calculated to write off the cost or valuation, less estimated residual value, of each asset on a straight-line basis over its expected useful life, as follows:

Office & Computer Equipment	–	3 years straight line basis
Motor vehicles	–	3 years straight line basis

Material residual value estimates are updated as required, but at least annually, whether or not the asset is revalued.

An asset is written down immediately to its recoverable amount if the asset’s carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposal are determined by comparing the proceeds with the carrying amount, and are recognised in the Income Statement.

When revalued assets are sold, the amounts included in other reserves are transferred to retained earnings.

Leasing and Hire Purchase Commitments

A finance lease is one in which a significant portion of the risks and rewards of ownership are transferred to the lessee. Assets obtained under finance leases and hire purchase contracts are capitalised in the Balance Sheet and are depreciated over their useful lives. The interest element of the rental obligations is charged to the Income Statement over the period of the lease, and represents a constant proportion of the balance of capital repayments outstanding.

An operating lease is one in which a significant portion of the risks and rewards of ownership are retained by the lessor. Rentals payable under operating leases are charged to the Income Statement on a straight-line basis over the term of the lease.

Impairment of Intangible Assets and Property, Plant and Equipment

For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). As a result, some assets are tested individually for impairment and some are tested at cash-generating unit level. Goodwill is allocated to those cash-generating units that are expected to benefit from the business combination on which the goodwill arose, and represent the lowest level within the Group at which management monitors the related cash flows.

Goodwill, other individual assets or cash-generating units that include goodwill, other intangible assets with an indefinite useful life, and those intangible assets not yet available for use, are tested for impairment at least annually. All intangible assets and property, plant and equipment with a finite life are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

An impairment loss is recognised for the amount by which the asset's or cash-generating unit's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of fair value, reflecting market conditions less costs to sell, and value in use, based on an internal discounted cash flow evaluation. With the exception of goodwill, all assets are subsequently reassessed for indications that an impairment loss previously recognised may no longer exist. Impairment losses are charged to administrative expenses.

Financial Assets

Financial assets are divided into the following categories: financial assets at fair value through profit or loss, held-to-maturity investments, loans and receivables, and available-for-sale financial assets. Financial assets are assigned to the different categories by management on initial recognition, depending on the purpose for which they were acquired. The designation of financial assets is re-evaluated at every reporting date at which a choice of classification or accounting treatment is available.

All financial assets are recognised when the Group becomes a party to the contractual provisions of the instrument.

Financial assets other than those categorised as at fair value through profit or loss are recognised initially at fair value plus transaction costs. Financial assets categorised as at fair value through profit or loss are recognised initially at fair value with transaction costs expensed through the Income Statement.

Financial assets at fair value through profit or loss are held for trading, i.e., acquired principally to be sold in the short term. Financial assets at fair value through profit or loss are measured after initial recognition at fair value, with changes in fair value being taken to the Income Statement in the period in which they occur.

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and a fixed date of maturity, where it is the intention of the directors to hold them until maturity. Held-to-maturity investments are measured after initial recognition at amortised cost, using the effective interest method. If there is objective evidence that the investment has been impaired, the financial asset is measured at the present value of estimated future cash flows. Any changes to the carrying amount of the investment are recognised in the Income Statement.

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables are measured after initial recognition at amortised cost, using the effective interest method, less provision for impairment. Any change in their value through impairment or reversal of impairment is recognised in the Income Statement.

Provision for impairment of trade receivables is made when there is objective evidence that the Group will not be able to collect all amounts due to it in accordance with the original terms of those receivables. The amount of the write-down is the difference between the receivable's carrying amount and the present value of the estimated future cash flows.

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. Available-for-sale financial assets are measured after initial recognition at fair value, with changes in fair value being taken to equity. On disposal, the accumulated gains and losses are taken to the Income Statement.

An assessment for impairment is undertaken at least annually.

Cash and Cash Equivalents

Cash and cash equivalents comprise cash in hand, demand deposits, bank overdrafts, and short-term, highly liquid investments that are readily convertible into known amounts of cash, and are subject to an insignificant risk of changes in value.

Disposal Group Held for Sale

A disposal group is a group of assets and liabilities whose carrying amount will be recovered principally through a sale transaction, not through continuing use. A disposal group held-for-sale is measured at the lower of its carrying amount immediately prior to its classification as held-for-sale and its fair value less costs to sell.

Discontinued Operations

A discontinued operation is a cash-generating unit, or a group of cash-generating units, that has either been disposed of, or is classified as held for sale, and:

- represents a separate major line of business or geographical area of operations;
- is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations; or
- is a subsidiary acquired exclusively with a view to resale.

The disclosures for prior periods have been re-presented to show the results of discontinued operations separately from continuing operations.

Financial Liabilities

Financial liabilities are recognised when the Group becomes a party to the contractual provisions of the instrument. Financial liabilities categorised as at fair value through profit or loss are measured initially at fair value, with all transaction costs being recognised immediately in the Income Statement. All other financial liabilities are measured initially at fair value, net of direct issue costs.

Financial liabilities categorised as at fair value through profit or loss are measured after initial recognition at fair value, with changes in fair value being taken to the Income Statement in the period in which they occur. All other financial liabilities are recorded at amortised cost, using the effective interest method, with interest-related charges being recognised as an expense under finance costs in the Income Statement.

Finance charges, including premiums payable on settlement or redemption and direct issue costs, are charged to the Income Statement on an accruals basis, using the effective interest method, and are added to the carrying amount of the instrument, to the extent that they are not settled in the period in which they arise.

A financial liability is derecognised only when the obligation is extinguished, that is, when the obligation is discharged, is cancelled, or expires.

Taxation

Current tax is the tax currently payable based on the taxable profit for the year.

Deferred tax is provided in full, using the liability method, on temporary differences between the carrying amounts of assets and liabilities and their tax bases, except when, at the initial recognition of the asset or liability, there is no effect on accounting or taxable profit or loss. Deferred tax is determined using tax rates and laws that have been substantially enacted by the Balance Sheet date, and that are expected to apply when the temporary difference reverses.

Tax losses available to be carried forward, and other tax credits to the Group, are recognised as deferred tax assets, to the extent that it is probable that there will be future taxable profits against which the temporary differences can be utilised.

Changes in deferred tax assets or liabilities are recognised as a component of the tax expense in the Income Statement, except where they relate to items that are charged or credited directly to equity (such as the revaluation of land), in which case the related deferred tax is also charged or credited directly to equity.

Share Capital

Ordinary shares are classified as equity. Mandatorily redeemable preference shares are classified as liabilities. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Revenue Recognition

Revenue comprises the fair value of the consideration received or receivable by the Group for goods supplied and services provided in the ordinary course of the Group's activities, excluding VAT and trade discounts. Revenue is recognised upon the performance of services or the transfer of risk to the customer.

2. Financial Risk Management

Liquidity Risk

The Group actively maintains a mixture of long-term and short-term debt finance that is designed to ensure that the Group has sufficient available funds for operations and planned expansions.

Capital Risk Management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern, in order to provide returns for shareholders and benefits for other stakeholders, and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

Consistent with others in the industry, the Group monitors capital on the basis of the gearing ratio. This is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including borrowings and trade and other payables as shown in the Consolidated Balance Sheet) less cash and cash equivalents. Total capital is calculated as equity, as shown in the Consolidated Balance Sheet, plus net debt.

Fair Value Estimation

The carrying value less impairment provision of trade receivables and payables is assumed to approximate to their fair values, due to their short-term nature. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the group for similar financial instruments.

3. Critical Accounting Estimates and Judgements

Estimates and judgements are continually evaluated. They are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

4. Turnover

All the Group's turnover arose from the Group's main activities which are based in the United Kingdom and relate to the Group's principal activity.
